**Book reviews** .. .. .. .. .. .. .. .. .. .. .. .. .. 143

**Earth's crust**
Structure of the crust beneath the Caledonian foreland and Caledonian belt of the North Scottish shelf region, *P. J. Smith & M. H. P. Bott* .. .. .. .. .. 187
Gravity and crustal thickness in the Indo–Gangetic Plains and Himalayan Region, India, *S. K. Choudhury* .. .. .. .. .. .. .. .. .. .. 441

**Elastic wave theory**
Distinctive particle motion of surface waves as a diagnostic of anisotropic layering, *Stuart Crampin* .. .. .. .. .. .. .. .. .. .. .. 177
The passage of elastic waves through an anomalous region—II. Transmission through a layer between two different media. *E. R. Lapwood, J. A. Hudson & V. K. Kembhavi* 241
The passage of elastic waves through an anomalous region—III. Transmission of obliquely incident body waves, *E. R. Lapwood & J. A. Hudson* .. .. .. .. 255
Surface displacements in an elastic half space due to a buried moving point source, *Arabinda Roy* .. .. .. .. .. .. .. .. .. .. .. 289
Changes in the Earth's inertia tensor due to earthquakes by MacCullagh's formula, *Moshe Israel & Ari Ben-Menahem* .. .. .. .. .. .. .. .. 305
The effect of discontinuities in density and rigidity on torsional eigenfrequencies of the Earth, *E. R. Lapwood* .. .. .. .. .. .. .. .. .. .. 453

**Electromagnetic induction**
Electromagnetic induction in the mantle by aperiodic variations, *R. J. Jady* .. .. .. 67

**Geomagnetism**
An induction study at micropulsation periods in the British Isles, *C. A. Green* .. .. 225
Strong geomagnetic fields during a single Icelandic polarity transition, *J. Shaw* .. .. 345

**Gravity**
Gravity and crustal thickness in the Indo–Gangetic Plains and Himalayan Region, India, *S. K. Choudhury* .. .. .. .. .. .. .. .. .. .. 441

PAGE

**Letters to the Editors**

A comment on ' Normal modes of a rotating, self-gravitating inhomogeneous Earth ', *M. N. Jones* .. .. .. .. .. .. .. .. .. .. .. .. 309
A reply to M. N. Jones, *Peter C. Luh* .. .. .. .. .. .. .. .. .. 309

**Normal modes of the Earth**

Maximum entropy estimates of Earth torsional eigenperiods from 1960 Trieste data, *B. A. Bolt & R. G. Currie* .. .. .. .. .. .. .. .. .. 107
A comment on ' Normal modes of a rotating, self-gravitating inhomogeneous Earth ', *M. N. Jones* .. .. .. .. .. .. .. .. .. .. .. .. 309
A reply to M. N. Jones, *Peter C. Luh* .. .. .. .. .. .. .. .. .. 309
The effect of discontinuities in density and rigidity on torsional eigenfrequencies of the Earth, *E. R. Lapwood* .. .. .. .. .. .. .. .. .. .. .. 453

**Oceanography**

A numerical model of the vertical circulation of tidal estuaries and its application to the Rotterdam Waterway, *Peter Hamilton* .. .. .. .. .. .. .. .. 1
Tides in the Bristol Channel, *A. F. Bennett* .. .. .. .. .. .. .. .. 37

**Palaeomagnetism**

The observed moment of a magnetized inclusion of high Curie point within a titanomagnetite particle of lower Curie point, *A. Stephenson* .. .. .. .. .. .. .. 29
A palaeomagnetic discordance between a lava sequence and an associated interbasaltic horizon from the Faeroe Islands, *R. Løvlie & M. Kvingedal* .. .. .. .. .. 45
The oxidation state of some Tertiary rocks from the Faeroe Islands and its implications for palaeomagnetism, *R. Løvlie* .. .. .. .. .. .. .. .. .. 55
Intensity of magnetization of subaerial and submarine basalts and its possible change with time, *Michel Prévot & Sherman Grommé* .. .. .. .. .. .. .. 207
The palaeomagnetism of Precambrian igneous and sedimentary rocks of the Orange River belt in South Africa and South West Africa, *J. D. A. Piper* .. .. .. .. 313

**Physics of rocks**

The observed moment of a magnetized inclusion of high Curie point within a titanomagnetite particle of lower Curie point, *A. Stephenson* .. .. .. .. .. .. .. 29

**Research notes**

On the Dalmation earthquake of 1962 January 7, *Harold Jeffreys* .. .. .. .. .. 139
Changes in the Earth's inertia tensor due to earthquakes by MacCullagh's formula, *Moshe Israel & Ari Ben-Menahem* .. .. .. .. .. .. .. .. .. 305

**Seismology**

The importance of damping in geophysics, *Harold Jeffreys* .. .. .. .. .. .. 23
Regional attenuation of short-period *P* and *S* waves in the United States, *Zoltan A. Der, Robert P. Massé & John P. Gurski* .. .. .. .. .. .. .. .. 85
Seismology, $dT/d\Delta$ and deep mantle convection, *C. Wright & J. A. Lyons* .. .. .. 115
On the Dalmation earthquake of 1962 January 7, *Harold Jeffreys* .. .. .. .. .. 139
Guide to the interpretation of crustal refraction profiles, *Lawrence W. Braile & Robert B. Smith* .. .. .. .. .. .. .. .. .. .. .. .. .. 145
The seismicity of the Marmara Sea region of Turkey, *Stuart Crampin & S. Balamir Uçer* .. 269
Generation of seismic waves by underwater explosions, *E. Wielandt* .. .. .. .. 421
Lg, Li and Rg from Rayleigh modes, *G. F. Panza & G. Calcagnile* .. .. .. .. 475

**Tectonics**

Seismology, $dT/d\Delta$ and deep mantle convection, *C. Wright & J. A. Lyons* .. .. .. 115
Circulation in fractures, hot springs, and convective transport on mid-ocean ridge crests, *Robert P. Lowell* .. .. .. .. .. .. .. .. .. .. .. .. 351
Seismicity, earthquake mechanisms and tectonics of Burma, 20° N–28° N, *Umesh Chandra* .. 367
Magnetic anomalies, bathymetry and the tectonic evolution of the South Pacific since the late Cretaceous, *Peter Molnar, Tanya Atwater, Jacqueline Mammerickx & Stuart M. Smith* .. .. .. .. .. .. .. .. .. .. .. .. 383
On the driving forces of plate tectonics, *J. F. Harper* .. .. .. .. .. .. .. 465

# SUBJECT INDEX

**Earth's core** PAGE

The free-oscillation equations at the centre of the Earth, *D. J. Crossley* .. .. .. .. 153
Simple models of the deformation of an Earth with a fluid core—II. Dissipation and magnetohydrodynamic effects, *Carl Wunsch* .. .. .. .. .. .. .. 165
Rotation of the Earth's solid core as a possible cause of declination, drift and reversals of the Earth's magnetic field, *M. Steenbeck & G. Helmis* .. .. .. .. .. 237

**Elastic waves**

The interaction of seismic waves with horizontal velocity contrasts—III. The effects of horizontal transition zones, *B. L. N. Kennett* .. .. .. .. .. .. 29
Stacking and stripping for normal mode eigenfrequencies, *Douglas Nyman* .. .. .. 271

**Geomagnetism**

The sunspot cycle influence on lunar and solar daily geomagnetic variations, *S. R. C. Malin, Anna Cecere & A. Palumbo* .. .. .. .. .. .. .. .. 115
A method for determining a generalized representation of geomagnetic field sources, *Kenneth L. Verosub* .. .. .. .. .. .. .. .. .. .. 127
Accelerating convergence techniques and grid spacing problems in two-dimensional magnetotelluric modelling, *W. Müller & W. Losecke* .. .. .. .. .. .. 185
Anomalies in daily variation magnetic fields and structure under north-western United States and south-western Canada, *P. A. Camfield & D. I. Gough* .. .. .. 193
Rotation of the Earth's solid core as a possible cause of declination, drift and reversals of the Earth's magnetic field, *M. Steenbeck & G. Helmis* .. .. .. .. .. 237

**Ionosphere**

Ferraro's contribution to ionospheric research, *J. E. C. Gliddon* .. .. .. .. .. 309
On the theory of diffusion in the ionosphere, *H. Rishbeth* .. .. .. .. .. 311
Calculated variations in the $H^+$ content of the plasmasphere, *J. A. Murphy, G. J. Bailey & R. J. Moffett* .. .. .. .. .. .. .. .. .. .. 319

PAGE

**Magnetohydrodynamics**

Simple models of the deformation of an Earth with a fluid core—II. Dissipation and magneto-hydrodynamic effects, *Carl Wunsch* .. .. .. .. .. .. 165
Theories of magnetic field annihilation, *E. R. Priest & B. U. Ö. Sonnerup* .. .. .. 405
Plumpton–Ferraro oscillations of a slowly rotating liquid sphere, *P. C. Kendall & J. A. Lawrie* 441

**Magnetosphere**

Does Mars have a magnetosphere? *Max K. Wallis* .. .. .. .. .. .. 349
The microstructure of the magnetopause, *D. M. Willis* .. .. .. .. .. .. 355
HEOS observations of the configuration of the magnetosphere, *P. C. Hedgecock & B. T. Thomas* .. .. .. .. .. .. .. .. .. .. .. 391

**Micropulsations**

The mid-latitude spatial structure of micropulsations, *A. H. Craven & J. A. Lawrie* .. .. 415
Comments on field line resonances and micropulsations, *D. J. Southwood* .. .. .. 425
Conjugate polarization characteristics of Pi2's, *W. F. Stuart* .. .. .. .. .. 433

**Normal Modes of the Earth**

The free-oscillation equations at the centre of the Earth, *D. J. Crossley* .. .. .. .. 153
Stacking and stripping for normal mode eigenfrequencies, *Douglas Nyman* .. .. .. 271

**Palaeomagnetism**

The palaeomagnetism of Triassic and Cretaceous rocks from Morocco, *E. A. Hailwood* .. 219
Palaeosecular variation at the Society Islands, French Polynesia, *Robert A. Duncan* .. .. 245

**Physics of rocks**

Thermal quenching of thermoluminescence in quartz, *A. G. Wintle* .. .. .. .. 107
Method to determine the degree of non-stoichiometry of iron-titanium oxides, *Arne Gidskehaug* 255

**Planetary magnetic fields**

Observations of the magnetic field structure of Jupiter, *D. Stannard* .. .. .. .. 327
Features of Jupiter's trapped particle environment associated with Jovian satellites—Pioneer 10 results and X-ray observations, *John F. Vesecky* .. .. .. .. .. 331
Origin of Jupiter's magnetic field, *R. Hide* .. .. .. .. .. .. .. 347
Does Mars have a magnetosphere? *Max K. Wallis* .. .. .. .. .. 349

**Rock magnetism**

Stability of anhysteretic remanent magnetization in fine and coarse magnetite and maghemite particles, *H. P. Johnson, W. Lowrie & D. V. Kent* .. .. .. .. .. 1
Cation diffusion processes and self-reversal of thermoremanent magnetization in the ilmenite-haematite solid solution series, *Kenneth A. Hoffman* .. .. .. .. .. 65
Remanent magnetizations in oxidized olivine, *G. S. Hoye & M. E. Evans* .. .. .. 139

**Seismology**

*P*-wave seismograms from three seismic sources in SW USSR, *E. A. Cullen & A. Douglas* .. 11
The interaction of seismic waves with horizontal velocity contrasts—III. The effects of horizontal transition zones, *B. L. N. Kennett* .. .. .. .. .. .. .. 29
Long-term behaviour of an aftershock sequence: the Inangahua, New Zealand, earthquake of 1968, *Russell Robinson, Walter J. Arabasz & F. F. Evison* .. .. .. .. 37
Spectral characteristics of the $L_g$ wave generated by central United States earthquakes, *Ronald L. Street, Robert B. Herrmann & Otto W. Nuttli* .. .. .. .. .. 51
Analysis to extended periods of Rayleigh and Love wave dispersion across Australia, *John H. Goncz, Anton L. Hales & Kenneth J. Muirhead* .. .. .. .. .. .. 81

**Static deformation**

Simple models of the deformation of an Earth with a fluid core—II. Dissipation and magneto-hydrodynamic effects, *Carl Wunsch* .. .. .. .. .. .. .. 165

**Thermoluminescence**

Thermal quenching of thermoluminescence in quartz, *A. G. Wintle* .. .. .. .. 107

**Book review**

Proceedings of Symposium on Earth's gravitational field and secular variations in position 1045

**Data analysis**

Statistical classification of weak seismic signals and noise at the NORSAR array, *Jan Fyen, Eystein Husebye & Anders Christofferson* .. .. .. .. .. .. 529
Monochromatic components of the seismic noise in the NORSAR area, *E. Hjortenberg & T. Risbo* .. .. .. .. .. .. .. .. .. .. .. 547
Automatic digitization of seismograms, *Hans Jarosch* .. .. .. .. .. .. 565
Vector errors in spherical harmonic analysis of scalar data, *F. J. Lowes* .. .. .. .. 637
A comparison of adaptive processing techniques with *N*th root beam-forming methods, *A. Ram & R. F. Mereu* .. .. .. .. .. .. .. .. .. 653
Fluctuation spectra of wavefields in geophysics, *I. Tolstoy* .. .. .. .. .. 803
On the subdivision of a spherical surface into elements of equal area, *R. J. Fryer* .. .. 883
On the analysis of vector arrays on a spherical surface, *R. J. Fryer* .. .. .. .. 893

**Deformation and creep**

The static deformation of an earth with a fluid core: a physical approach, *Michael A. Chinnery* 461
Tidal strain enhancement observed across a tunnel, *U. J. Itsueli, R. G. Bilham, N. R. Goulty & G. C. P. King* .. .. .. .. .. .. .. .. .. .. 555

PAGE

Dynamical model for the detachment of descending lithosphere, *Han-shou Liu* .. .. 607
On the stability of a spherical gravitating compressible liquid planet without spin, *I. M. Longman* .. .. .. .. .. .. .. .. .. .. .. .. 621
On the forces driving plate tectonics: inferences from absolute plate velocities and intraplate stress, *Sean C. Solomon, Norman H. Sleep & Randall M. Richardson* .. .. .. 769
Stress and flow beneath island arcs, *Norman H. Sleep* .. .. .. .. .. .. 827

**Density of the Earth**

Resolution techniques for density and heterogeneity in the Earth, *Bruce A. Bolt & Robert Uhrhammer* .. .. .. .. .. .. .. .. .. .. .. 419

**Earth's core**

Inertial waves and the Earth's outer core, *K. D. Aldridge* .. .. .. .. .. 337
A model of the geodynamo, *F. H. Busse* .. .. .. .. .. .. .. .. .. 437
Core undertones with rotation, *D. J. Crossley* .. .. .. .. .. .. .. 477

**Earth's mantle**

Role of phase transitions in a dynamic mantle, *Gerald Schubert, David A. Yuen & Donald L. Turcotter* .. .. .. .. .. .. .. .. .. .. .. 705
On the occurrence of (Mg, Fe)$SiO_2$ in the lower mantle, *E. K. Graham* .. .. .. .. 993

**Earth's origin**

Speculations on the thermal and tectonic history of the Earth, *Dan McKenzie & Nigel Weiss* .. 131

**Elastic wave theory**

Scattering of *SH* waves by a rough half-space of arbitrary slope, *F. J. Sabina & J. R. Willis* .. 685
The application of finite element analysis to body wave propagation problems, *Warwick D. Smith* .. .. .. .. .. .. .. .. .. .. .. .. 747

**Electrical methods**

An integral equation and its solution for some two- and three-dimensional problems in resistivity and induced polarization, *T. Lee* .. .. .. .. .. .. 81
Stable iterative methods for the inversion of geophysical data, *D. L. B. Jupp & K. Vozoff* .. 957
Joint inversion of geophysical data, *K. Vozoff & D. L. B. Jupp* .. .. .. .. .. 977

**Electromagnetic induction**

Electromagnetic induction in the oceans, *B. A. Hobbs* .. .. .. .. .. .. 307
Analytic Green's tensors for integral equation modelling, *A. P. Raiche & J. H. Coggan* .. 1035

**Gravity methods**

The theory of ideal bodies for gravity interpretation, *R. L. Parker* .. .. .. .. 315

**Inverse problem**

Well-posed inverse eigenvalue problems, *Victor Barcilon* .. .. .. .. .. .. 375
Resolution techniques for density and heterogeneity in the Earth, *Bruce A. Bolt & Robert Uhrhammer* .. .. .. .. .. .. .. .. .. .. 419
Can one determine seismic focal parameters from the far-field radiation? *L. Knopoff & J. O. Mouton* .. .. .. .. .. .. .. .. .. .. 591
Stable iterative methods for the inversion of geophysical data, *D. L. B. Jupp & K. Vozoff* .. 957
Joint inversion of geophysical data, *K. Vozoff & D. L. B. Jupp* .. .. .. .. .. 977

**Magnetic field**

On the helical dynamo of Lortz as a model for the steady main geomagnetic field, *Edward R. Benton* .. .. .. .. .. .. .. .. .. .. .. 385
A model of the geodynamo, *F. H. Busse* .. .. .. .. .. .. .. .. .. 437

**Magnetohydrodynamics**

Numerical solutions of the hydromagnetic dynamo problem, *David Gubbins* .. .. .. 295
On the helical dynamo of Lortz as a model for the steady main geomagnetic field, *Edward R. Benton* .. .. .. .. .. .. .. .. .. .. .. 385

PAGE

**Marine geology**

Axial intrusion zone beneath the median valley of the Mid-Atlantic Ridge at 37° N detected by explosion seismology, *R. B. Whitmarsh* .. .. .. .. .. .. 189

**Normal modes**

Core undertones with rotation, *D. J. Crossley* .. .. .. .. .. .. .. 477
Electromagnetic and viscous damping of core oscillations, *D. J. Crossley & D. E. Smylie* .. 1011

**Oceanography**

The residual water flow through the Solent, South England, *K. R. Dyer & H. Lasta King* .. 97
Tidal computations for Morecambe Bay, *R. A. Flather & N. S. Heaps* .. .. .. .. 489

**Palaeomagnetism**

Palaeomagnetism and K–Ar ages of the South-west African basalts and their bearing on the time of initial rifting of the South Atlantic Ocean, *A. Gidskehaug, K. M. Creer & J. G. Mitchell* .. .. .. .. .. .. .. .. .. .. 1
Origin of the magnetization of the Wichita Mountains Granites, Oklahoma, *S. A. Vincenz, K. Yaskawa & J. M. Ade-Hall* .. .. .. .. .. .. .. .. 21
Determination of geomagnetic palaeointensities in vacuum, *Abdulwahab A. Khodair & Robert S. Coe* .. .. .. .. .. .. .. .. .. 107
Palaeomagnetism of Cretaceous Pacific seamounts, *C. G. A. Harrison, R. D. Jarrard, V. Vacquier & R. L. Larson* .. .. .. .. .. .. .. .. .. 859

**Physics of rocks**

Temperature dependence of single-crystal spinel ($MgAl_2O_4$) elastic constants from 293 to 423° K measured by light-sound scattering in the Raman–Nath region, *Hsi-Ping Liu, R. N. Schock & Don L. Anderson* .. .. .. .. .. .. .. .. 217
Role of phase transitions in a dynamic mantle, *Gerald Schubert, David A. Yuen & Donald L. Turcotter* .. .. .. .. .. .. .. .. .. .. 705
Elasticity of olivine ($\alpha$), beta ($\beta$), and spinel ($\gamma$) polymorphs of germanates and silicates, *Robert C. Liebermann* .. .. .. .. .. .. .. .. .. 899

**Planets and solar system**

The internal structures of the planets, *A. H. Cook* .. .. .. .. .. .. 285

**Potential theory**

A solution of some problems in potential theory, *J. L. Le Mouel, V. Courtillot & J. Ducruix* .. 251

**Research notes**

Measurement of airgun waveforms, *S. G. Smith* .. .. .. .. .. .. .. 273
Analytic Green's tensors for integral equation modelling, *A. P. Raiche & J. H. Coggon* .. 1035
On the amplitudes of seismic waves, *J. A. Hudson & A. Douglas* .. .. .. .. .. 1039

**Seismicity**

A branching Poisson–Markov model of earthquake occurrences, *Seymour Shlien & M. Nafi Toksöz* .. .. .. .. .. .. .. .. .. .. .. 49
A new magnitude-frequency relation for earthquakes and a classification of relation types, *George Purcaru* .. .. .. .. .. .. .. .. .. 61
Statistical methods of use in analysing sequences of earthquakes, *John Rice* .. .. .. 671
Stochastic models for earthquake sequences, *D. Vere-Jones* .. .. .. .. .. 811

**Seismology**

A procedure for modelling shallow dislocation sources, *Charles A. Langston & Donald V. Helmberger* .. .. .. .. .. .. .. .. .. .. .. 117
Rayleigh wave spectra and group velocity minima, and the resonance of *P*-waves in layered structures, *J. A. Hudson & A. Douglas* .. .. .. .. .. .. .. 175
Axial intrusion zone beneath the median valley of the Mid-Atlantic Ridge at 37° N detected by explosion seismology, *R. B. Whitmarsh* .. .. .. .. .. .. 189
Measurement of airgun waveforms, *S. G. Smith* .. .. .. .. .. .. .. 273
Comparison of strong ground motion from several dislocation models, *John G. Anderson & Paul G. Richards* .. .. .. .. .. .. .. .. .. 347

PAGE

Wave scattering theory in analysis of *P*-wave anomalies at NORSAR and LASA, *K. A. Berteussen, A. Christoffersson, E. S. Husebye & A. Dahle* .. .. .. .. 403
Transmission effects in the continuous one-dimensional seismic model, *Manus Foster* .. .. 519
Statistical classification of weak seismic signals and noise at the NORSAR array, *Jan Fyen, Eystein Husebye & Anders Christofferson* .. .. .. .. .. .. 529
Monochromatic components of the seismic noise in the NORSAR area, *E. Hjortenberg & T. Risbo* .. .. .. .. .. .. .. .. .. .. .. 547
Theoretical seismogram calculation for laterally varying crustal structures, *B. L. N. Kennett* .. 579
Can one determine seismic focal parameters from the far-field radiation? *L. Knopoff & J. O. Mouton* .. .. .. .. .. .. .. .. .. .. .. 591
Depth determination by use of teleseismic *P*-arrivals, *R. Slunga* .. .. .. .. .. 737
Multimode surface waves for selected focal mechanisms—II. Dip-slip sources, *G. F. Panza, F. Schwab & L. Knopoff* .. .. .. .. .. .. .. .. .. 931
Multimode surface waves for selected focal mechanisms—III. Strike-slip sources, *G. F. Panza, F. Schwab & L. Knopoff* .. .. .. .. .. .. .. .. .. 945
On the amplitudes of seismic waves, *J. A. Hudson & A. Douglas* .. .. .. .. .. 1039

**Tectonics**

Origin of the magnetization of the Wichita Mountains Granites, Oklahoma, *S. K. Vincenz, K. Yaskawa & J. M. Ade-Hall* .. .. .. .. .. .. .. 21
Dynamical model for the detachment of descending lithosphere, *Han-shou Liu* .. .. 607
On the forces driving plate tectonics: inferences from absolute plate velocities and intraplate stress, *Sean C. Solomon, Norman H. Sleep & Randall M. Richardson* .. .. .. 769
Stress and flow beneath island arcs, *Norman H. Sleep* .. .. .. .. .. .. 827

# SUBJECT INDEX

PAGE

**Book reviews**

Collected papers of Sir Harold Jeffreys on geophysics and other sciences, Volumes 2 and 3 643
Introduction to theoretical geophysics .. .. .. .. .. .. .. .. 644
Physical and dynamic climatology .. .. .. .. .. .. .. .. .. 1023
Structure and dynamics of the upper atmosphere .. .. .. .. .. .. 1024
Atmospheric waves .. .. .. .. .. .. .. .. .. .. .. .. 1025
Time sequence analysis in geophysics .. .. .. .. .. .. .. .. 1026

PAGE

**Data analysis**
Complex demodulation of geomagnetic data and the estimation of transfer functions, *R. J. Banks* .. .. .. .. .. .. .. .. .. .. .. 87
Autoregressive representation of seismic *P*-wave signals with an application to the problem of short-period discriminants, *D. Tjøstheim* .. .. .. .. .. .. 269

**Deformation and creep in solids**
Buckling of strike-slip faults—in a model and in nature, *A. M. Merzer & R. Freund* .. 517
An improved representation of boundary conditions in finite difference schemes for seismological problems, *Alomga Ilan, Abraham Ungar & Zipora Alterman* .. .. .. 727
Dominant creep mechanism and the descending lithosphere, *H. J. Neugebauer & G. Breitmayer* 873

**Dynamics of the Earth**
Total effect of any nearly-diurnal wobble of the Earth's axis of rotation in latitude and time observations. Application to the Paris astrolabe observations from 1956.6 to 1973.8, *Nicole Capitaine* .. .. .. .. .. .. .. .. .. .. 573

**Earth tides**
Period, $Q_p$ and amplitude of the pole tide, *Robert G. Currie* .. .. .. .. .. 73
Tidal triggering of earthquakes, *Thomas H. Heaton* .. .. .. .. .. .. 307
The effect of ocean tide loading on tides of the solid earth observed with the superconducting gravimeter, *Richard J. Warburton, Christopher Beaumont & John M. Goodkind* .. 707

**Earth's core**
On hydromagnetic oscillations within the Earth and core–mantle coupling, *D. L. Acheson* .. 253
On the ($\gamma$, $\varepsilon$, $l$) triple point of iron and the Earth's core, *Lin-gun Liu* .. .. .. .. 697

**Earth's crust**
The structure of the crust and upper mantle in the region of Barbados and the Lesser Antilles, *Graham K. Westbrook* .. .. .. .. .. .. .. .. .. 201
The crust and upper mantle of Central Mexico, *James E. Fix* .. .. .. .. .. 453
*P*-wave scattering in the Earth's crust and upper mantle, *J. R. Cleary, D. W. King & R. A. W. Haddon* .. .. .. .. .. .. .. .. .. .. .. 861

**Earth's mantle**
The early structural evolution and anisotropy of the oceanic upper mantle, *Donald W. Forsyth* 103
The structure of the crust and upper mantle in the region of Barbados and the Lesser Antilles, *Graham K. Westbrook* .. .. .. .. .. .. .. .. .. 201
The crust and upper mantle of Central Mexico, *James E. Fix* .. .. .. .. .. 453
The relative motion of ' hot spots ' in the Atlantic and Indian Oceans during the Cenozoic, *Peter Molnar & Jean Francheteau* .. .. .. .. .. .. .. 763
*P*-wave scattering in the Earth's crust and upper mantle, *J. R. Cleary, D. W. King & R. A. W. Haddon* .. .. .. .. .. .. .. .. .. .. 861

**Earthquakes**
Tidal triggering of earthquakes, *Thomas H. Heaton* .. .. .. .. .. .. 307
An inversion method for estimating the source parameters of seismic and aseismic events from static strain data, *Dushan B. Jovanovich* .. .. .. .. .. .. 347
The fracture energy of earthquakes, *Moujahed I. Husseini, Dushan B. Jovanovich, M. J. Randall & L. B. Freund* .. .. .. .. .. .. .. .. .. 367
Source properties of shallow earthquakes in New Zealand and their tectonic associations, *S. J. Gibowicz & T. Hatherton* .. .. .. .. .. .. .. .. 589
Determination of precursory velocity anomalies in New Zealand from observatory data on local earthquakes, *F. F. Evison* .. .. .. .. .. .. .. .. 957

**Elastic wave theory**
Comments on the paper ' On variational principles and matrix methods in elastodynamics ' by B. L. N. Kennett, *G. Jobert, N. Jobert & B. L. N. Kennett* .. .. .. .. 721
Propagator and Green matrices for body force and dislocation, *Georges Jobert* .. .. 755

**Electromagnetic induction**
Low frequency (0·1–6·0 cpd) electromagnetic study of deep mantle electrical conductivity beneath the Hawaiian Islands, *J. C. Larsen* .. .. .. .. .. .. 17
The North American Central Plains conductivity anomaly, *A. O. Alabi, P. A. Camfield & D. I. Gough* .. .. .. .. .. .. .. .. .. .. .. 815

PAGE

Theoretical uniqueness of the magnetotelluric inverse problem for equal penetration discretizable models, *Dan Loewenthal* .. .. .. .. .. .. .. 897
A conductivity anomaly in the Western Mediterranean, *E. Le Borgne & J. L. Le Mouel* .. 939

**Gravity methods and surveys**
The effect of ocean tide loading on tides of the solid earth, observed with the superconducting gravimeter, *Richard J. Warburton, Christopher Beaumont & John M. Goodkind* .. 707

**Heat flow**
Temperature phenomena and heat flow estimates in two Precambrian ore-bearing areas in North Sweden, *D. S. Parasnis* .. .. .. .. .. .. .. .. 531
Focusing and defocusing of heat flow by a buried sphere, *Tien-Chang Lee* .. .. .. 635

**Inverse problem**
Inversion schemes for surface wave attenuation and $Q$ in the crust and the mantle, *Wook Bae Lee & Sean C. Solomon* .. .. .. .. .. .. .. .. 47
An inversion method for estimating the source parameters of seismic and aseismic events from static strain data, *Dushan B. Jovanovich* .. .. .. .. .. .. 347

**Magnetic field–Earth**
The analysis of daily variations recorded by magnetometer arrays, *F. E. M. Lilley* .. .. 1
Complex demodulation of geomagnetic data and the estimation of transfer functions, *R. J. Banks* .. .. .. .. .. .. .. .. .. .. .. 87
An analysis of near-bottom magnetic anomalies: sea-floor spreading and the magnetized layer, *K. D. Klitgord, S. P. Huestis, J. D. Mudie & R. L. Parker* .. .. .. 387
Apparent magnetic constant at Istanbul, *Yilmaz İspir & A. Mete Isikara* .. .. .. 621
Modulation of geomagnetic lunar daily variation in $H$ at Alibag with lunar distance, *B. R. Arora & D. R. K. Rao* .. .. .. .. .. .. .. .. .. 627
A model of the geomagnetic field at epoch 1975, *D. R. Barraclough, J. M. Harwood, B. R. Leaton & S. R. C. Malin* .. .. .. .. .. .. .. .. .. 645
Can precession power the geomagnetic dynamo?, *M. G. Rochester, J A. Jacobs, D. E. Smylie & K. F. Chong* .. .. .. .. .. .. .. .. .. 661
Independence of geomagnetic polarity intervals, *Jeffrey D. Phillips, Richard J. Blakely & Allan Cox* .. .. .. .. .. .. .. .. .. .. 747
Long period European geomagnetic secular variation confirmed, *R. Thompson* .. .. 847

**Magnetohydrodynamics**
On hydromagnetic oscillations within the Earth and core–mantle coupling, *D. L. Acheson* .. 253
Can precession power the geomagnetic dynamo?, *M. G. Rochester, J. A. Jacobs, D. E. Smylie & K. F. Chong* .. .. .. .. .. .. .. .. .. 661

**Marine geology**
A geophysical study of the Red Sea axial trough between 20·5° and 22° N, *Roger C. Searle & David A. Ross* .. .. .. .. .. .. .. .. .. .. 555

**Mechanical properties**
The effective elastic moduli of model sediments, *K. Walton* .. .. .. .. .. 293

**Normal modes of the Earth**
The effect of anelasticity on periods of the Earth's free oscillations (toroidal modes), *Hsi-Ping Liu & Charles B. Archambeau* .. .. .. .. .. .. .. .. 795
Asymptotic structure in eigenfrequencies of spheroidal normal modes of the Earth, *R. S. Anderssen, J. R. Cleary & A. M. Dziewonski* .. .. .. .. .. .. 1001
Some asymptotic properties of the normal modes of the Earth, *Freeman Gilbert* .. .. 1007

**Palaeomagnetism**
Palaeomagnetic field directions in Siluro–Devonian lavas of the Lorne Plateau, Scotland, and their regional significance, *A. G. Latham & J. C. Briden* .. .. .. .. 243
Analysis of Brunhes epoch palaeomagnetic data in terms of geocentric and offset axial dipole fields: long-term flattening of the dipole field?, *N. D. Watkins & A. Richardson* .. 501
Gas-mixing techniques in thermomagnetic analysis, *Edwin E. Larsen, Richard P. Hoblitt & Donald E. Watson* .. .. .. .. .. .. .. .. .. .. 607
Palaeolatitude and relative position of south-west Japan and Korea in the Cretaceous, *Katsumi Yaskawa* .. .. .. .. .. .. .. .. .. .. 835

PAGE

Palaeomagnetism of the Breidden Hill (Palaeozoic) inlier, Welsh borderlands, *J. D. A. Piper & J. E. F. Stearn* .. .. .. .. .. .. .. .. .. .. 1013
Rapid demagnetization of palaeomagnetic samples using a rotating magnetic field, *Mark Noël & L. Molyneux* .. .. .. .. .. .. .. .. .. .. 1017

**Physics of rocks**
On the ($\gamma$, $\varepsilon$, $l$) triple point of iron and the Earth's core, *Lin-gun Liu* .. .. .. .. 697

**Research notes**
Focusing and defocusing of heat flow by a buried sphere, *Tien-Chang Lee* .. .. .. 635
Asymptotic structure in eigenfrequencies of spheroidal normal modes of the Earth, *R. S. Anderssen, J. R. Cleary & A. M. Dziewonski* .. .. .. .. .. .. 1001
Some asymptotic properties of the normal modes of the Earth, *Freeman Gilbert* .. .. 1007
Palaeomagnetism of the Breidden Hill (Palaeozoic) inlier, Welsh borderlands, *J. D. A. Piper & J. E. F. Stearn* .. .. .. .. .. .. .. .. .. .. 1013
Rapid demagnetization of palaeomagnetic samples using a rotating magnetic field, *Mark Noël & L. Molyneux* .. .. .. .. .. .. .. .. .. .. 1017

**Seismic methods and surveys**
Measurement of tilt in a deep-level gold mine and its relationship to mining and seismicity, *A. McGarr & R. W. E. Green* .. .. .. .. .. .. .. .. 327
The accuracy of determination of seismic interval velocities from variable angle reflection (disposable sonobuoy) records, *W. Q. Limond & Ph. Patriat* .. .. .. .. 905

**Seismicity**
Measurement of tilt in a deep-level gold mine and its relationship to mining and seismicity, *A. McGarr & R. W. E. Green* .. .. .. .. .. .. .. .. 327

**Seismology**
Inversion schemes for surface wave attenuation and $Q$ in the crust and the mantle, *Wook Bae Lee & Sean C. Solomon* .. .. .. .. .. .. .. .. 47
Autoregressive representation of seismic $P$-wave signals with an application to the problem of short-period discriminants, *D. Tjøstheim* .. .. .. .. .. .. 269
Theoretical seismograms for the Columbian earthquake of 1970 July 31, *Peter C. Luh* .. 679
An improved representation of boundary conditions in finite difference schemes for seismological problems, *Alomga Ilan, Abraham Ungar & Zipora Alterman* .. .. .. 727
Generation of pseudotachylyte by ancient seismic faulting, *Richard H. Sibson* .. .. .. 775
$P$-wave scattering in the Earth's crust and upper mantle, *J. R. Cleary, D. W. King & R. A. W. Haddon* .. .. .. .. .. .. .. .. .. .. 861

**Tectonics**
The early structural evolution and anisotropy of the oceanic upper mantle, *Donald W. Forsyth* 103
On the relative importance of the driving forces of plate motion, *Donald Forsyth & Seiya Uyeda* .. .. .. .. .. .. .. .. .. .. 163
An analysis of near-bottom magnetic anomalies: sea-floor spreading and the magnetized layer, *K. D. Klitgord, S. P. Huestis, J. D. Mudie & R. L. Parker* .. .. .. .. 387
A physical model for the creation of the lithosphere, *Douglas W. Oldenburg* .. .. .. 425
Buckling of strike-slip faults—in a model and in nature, *A. M. Merzer & R. Freund* .. 517
Source properties of shallow earthquakes in New Zealand and their tectonic associations, *S. J. Gibowicz & T. Hatherton* .. .. .. .. .. .. .. .. 589
The relative motion of ' hot spots ' in the Atlantic and Indian Oceans during the Cenozoic, *Peter Molnar & Jean Francheteau* .. .. .. .. .. .. .. 763
Dominant creep mechanism and the descending lithosphere, *H. J. Neugebauer & G. Breitmayer* .. .. .. .. .. .. .. .. .. 873
The eastern end of the Azores–Gibraltar plate boundary, *G. M. Purdy* .. .. .. .. 973
